Subject: complaint re water charges

I write to you as you are responsible for *icon water*.

My complaint is that for water consumption over a very minimal level, icon more than doubles the charge! It jumps from \$2.6 per kL to \$5.22 per kL

I can understand why this great impost was made during a drought. Why is it continued?

It is the system of charging I am complaining about. The effect will be to kill the gardens of Canberra, because people will not be able to pay this amount of extra surcharge.

Please reduce this extra charge immediately. It is quite unnecessary and counter-productive. Think about the consequences!

This issue is of grave concern to all Canberrans who tend for and care about their gardens. You would be unwise to ignore them.

Yours sincerely

Dr Kristine Klugman OAM
